

November 04, 2025: On What Led Us Here

After the 2020 election, 'leaders' of America called on the public to help them find and root out evil in the country to 'Make America Great Again.'

Seeing as how I have been studying religion and law for my entire life, I was happy to come to the aid of my country - and I was also very good at the job.

After learning that I had caught the attention of the team that surrounds 'President' Donald Trump, I began to show them specifically where evil is and how evil works.

As they 'observed' more and more of my work, they revealed more and more about themselves.

Every day it became more and more apparent: the evil that we were seeking to remove from our country was actually their team all along.

The realization eventually become readily apparent: their evil team was simply drawing in the 'patriots' of America - so that they knew who to sabotage, who to conquer, and who to eliminate from their path as they finished off what was left of the country's will to survive.

Now, about 4 years later, I am harassed every single moment by their team of spies - as they operate from within a spying monster that cannot be anything less than the United States government combined with a team of criminals that is being controlled through a worldwide network of Freemasons.

If you don't know - now you know.
